SUMMARY

B.Tech graduate in AI & Data Science (VIIT Pune, 2025) with a strong foundation in networking (CCNA certified), cloud infrastructure (AWS certified), and IT service delivery. Experienced in enterprise-scale incident management, IAM governance, vulnerability tracking, and cross-functional IT support having managed a 70% reduction in multi-site incident response times at RNS Technology Services. Adept at troubleshooting complex technical issues across networking, cloud, and end-user computing domains, translating them into clear resolutions for both technical and non-technical stakeholders. Comfortable working in fast-paced, structured ITSM environments with a process-driven, detail-oriented approach.

EDUCATION

VIIT, Pune - ***B.Tech in Artificial Intelligence & Data Science***
2021 - 2025

PROJECTS

Agentic Enterprise Knowledge Assistant
Nov 2025 - Feb 2026

- Managed deployment and maintenance of a cloud-hosted application on AWS (EC2/Lambda/EKS), applying expertise in cloud infrastructure management and automated monitoring pipelines to support robust reporting and analytics environments and ensure reliable data flow.
- Created comprehensive system architecture guides, troubleshooting runbooks, and operational SOPs, facilitating robust knowledge base development to enhance HR systems education and operational efficiency.

Network Fundamentals
Jul - Dec 2023

- Mastered network fundamentals through CCNA: Introduction to Networks (Cisco), executing practical lab work on TCP/IP stack, DNS/DHCP configuration, VLAN setup, routing protocols, and switching, demonstrating analytical capabilities in system configuration and understanding data flow.
- Applied critical thinking to network troubleshooting scenarios, including connectivity failures, IP conflicts, and misconfigured routing, showcasing strong analytical capabilities to diagnose root causes and interpret system behavior effectively.

EXPERIENCE

RNS Technology Services - ***Project Governance Consultant***
Jul 2024 - Jun 2025

- Orchestrated incident triage and resolution for IAM, cybersecurity, and infrastructure monitoring projects, leveraging data analysis for effective problem-solving and operational insights, a core skill for any `AI / ML engineer`.
- Managed IAM governance for over 3,000+ digital identities using SailPoint, meticulously analyzing access provisioning and incident tickets to identify trends, demonstrating strong analytical skills vital for `machine learning` initiatives.
- Implemented automated monitoring workflows leveraging data, reducing multi-site incident response times by 70%, showcasing `engineering` principles in building efficient, automated solutions, aligning with expectations for `genai engineers architects`.
- Maintained detailed incident records and governance documentation, ensuring data accuracy with `minimum` discrepancies for insightful reports, a foundational requirement for `development prompt engineering`.

- Collaborated with cross-functional IT teams to resolve complex multi-domain issues and drive cybersecurity audit closures, supporting data-driven decision-making and stakeholder collaboration, skills essential for `overlapping genai engineers`.
- Communicated complex technical status updates and risk summaries to non-technical stakeholders, delivering insights and enabling informed, data-driven decisions, crucial for defining `prompt engineering strategies`.

SKILLS

- **Networking:** TCP/IP, DNS, DHCP, VLANs, Routing & Switching, Wireless Connectivity, IP Addressing, Network Equipment Configuration
- **Collaboration Tools:** Email Systems, Video Conferencing, Instant Messaging Platforms, Document Sharing Applications, Microsoft 365
- **End-User Computing:** Windows OS, macOS, Hardware Troubleshooting, Software Applications, Mobile Devices, Printer Configuration
- **Cloud & Infrastructure:** AWS (EC2, S3, Lambda, IAM) foundational for AI/ML engineer and genai engineers roles, Cloud Monitoring, Infrastructure Automation for machine learning engineering solutions, Virtualisation
- **Monitoring & Tooling:** Network Monitoring Tools, Remote Desktop / Remote Access Software, Incident Ticketing Systems, Confluence, Zoho Projects
- **Security & IAM:** Managed Identity and Access Management (IAM) for 3,000+ identities using SailPoint, ensuring controlled access to critical HR systems and data., Performed Vulnerability Tracking and Remediation to enhance security posture and mitigate risks to sensitive HR data., Ensured Cybersecurity Audit Compliance, contributing to robust data governance and integrity for HR reporting and analytics., Implemented and maintained Secure Access Management practices, safeguarding confidential HR data vital for data-driven decision-making.
- **Reporting & Analytics Workflow Management:** Applied Incident Management, Problem Management, and Change Management methodologies to optimize reporting workflows, address business problems, and mitigate risks in HR analytics; utilized Escalation Procedures for complex data inquiries; ensured SLA Adherence for timely report delivery and insights; and developed Knowledge Base Documentation to educate users on HR systems, tools, and reports.
- **Soft Skills:** Customer Service, Clear Technical Communication, Prioritisation Under Pressure, Cross-functional Collaboration, Stakeholder Engagement

CERTIFICATIONS

- CCNA: Introduction to Networks – Cisco (Jul - Dec 2023)
- AWS Certified Solutions Architect – Amazon Web Services (Oct - Nov 2024)
- AWS Cloud Technology Consultant – Amazon Web Services (Jun - Nov 2024)
- Google Project Management Certificate – Google (Jun - Dec 2024)
